

Please do not let NAB stop XM from providing instant Traffic and Weather info. My husband is a truck driver. XM provides him with up to date information about the areas that he travels to weekly. Not only that, we like the ability to enjoy nonstop music and no commercials. We pay for this service, simply because we can choose good stations, with good information and good music. We have XM both in our home and in my husbands over the road tractor. Please, we respectfully urge you to reject petition 04-160. The National Association of Broadcasters is interested only in their bottom line, not my welfare and ability to choose the services I want.

Respectfully,  
Martha Richards
